PROFESSIONAL SUMMARY

Experienced Full Stack Web Developer and ICT Officer with a strong foundation in MERN Stack (MongoDB, Express.js, React.js, Node.js) and a proven track record in developing robust, user- friendly web applications. Skilled in both front-end and back-end development, I have successfully designed, built, and maintained eCommerce, cargo tracking, and bus booking platforms. With a deep understanding of API development, database management, and performance optimization, I deliver scalable, secure, and high-performing solutions.

KEY SKILLS

- *Strong Technical*
- *SkillAttention to Detail*
- *Communication Skills*
- *Problem-Solving Skills*
- *Adaptability Collaboration*
- *and Teamwork*

EXPERTISE

Frontend: React.js, Next.js, Javascript, TypeScript, Redux, Tailwind CSS, Bootstrap.

Backend: Node.js, Express.js, RESTful APIs, GraphQL.

Databases: MongoDB, MySQL, Firebase.

PROFESSIONAL EXPERIENCE

Full-Stack Developer
myElectrovault ltd. Nigeria   2024

- *I designed and implemented a dynamic and responsive user interface using React.js to ensure seamless user experiences across devices.*
- *I built reusable components for key e-commerce features like product listings, search filters, shopping cart, and user authentication.*
- *I integrated frontend with the backend API for real-time data fetching, ensuring smooth product browsing, cart updates, and checkout workflows.*
- *Developed a robust backend using Node.js and Express.js to handle server-side logic, including user authentication, order processing, and payment integration.*
- *Built RESTful APIs to connect the frontend with the database and enable efficient data flow between client and server.*

Full-Stack Developer   2023
BabaStar Transportation

- *Created a responsive and interactive user interface for the bus booking platform using React.js, ensuring smooth user navigation for bus search, booking, and seat selection across desktop and mobile devices.*
- *Developed a dynamic seat selection feature that updates in real time, allowing users to pick and book available seats on the bus based on their preferences and the chosen route.*
- *Developed the backend with Node.js and Express.js to manage bus schedules, routes, seat availability, user reservations, and payment processing.*

Full-Stack Developer
Speedy-Spell Cargo Ltd   2021

- *Interactive User Interface: Designed a clean and user-friendly front end using React.js to ensure a seamless cargo booking experience for customers.*
- *The interface allowed users to easily input shipment details, track cargo, and manage their bookings.*
- *Developed search and tracking features that allow customers to track their cargo in real time, viewing updates on location and estimated delivery times.*
- *Built intuitive forms for customers to place cargo orders, select shipment preferences (such as weight, destination, and shipping method), and manage payment details for a streamlined process.*

EDUCATION

- *University of Ilorin , Nigeria*
  Bsc. Educational Technology
- *Advanced NABTEB. ANBC / ANTC Diploma. Computer science/Craft Studies*
